From the sea to the mountains— amazing sights abound here!

The Larger Toyama Core Partner City Region (Toyama Area) is home to the mysterious Toyama Bay, known for its firefly squid and broad velvet shrimp, as well as the Toyama Plain, which stretches out around the Bay, and the majestic peaks of the Tateyama Mountain Range.

From the sea, to the city center, to the mountain peaks—some rising as high as 3,000 meters—there are plenty of sights and activities in this pamphlet exist only in this area. This pamphlet shows the reader the fine sightseeing spots in this area (Toyama City, Namerikawa City, Funahashi Village, Kamiichi Town, Tateyama Town) broken down into the three categories of tradition, history and nature, and gives an overview of sightseeing packages in these three categories.

Why not see for yourself the charms this area has to offer?

Toyama City

Core Partner City Spanning from the Sea to the Mountains

Toyama has much to offer visitors: from the city center, the epitome of a compact city, and Iwase, the lasting legacy of an ancient Japanese shipping route, to the refined elegance of Yatsuo with its Owara Kaze no Bon festival, to Kureha, the home of the Glass City Toyama, to the outdoor adventures in the foothills of Mt. Tateyama.

Namerikawa City

City of Firefly Squid and Deep Sea Water

Namerikawa City faces Toyama Bay and is famous for its catches of countless firefly squid (hotaruika). In addition to observing firefly squid out at sea and the Hotaruika Museum, this city also offers bathing facilities that utilize deep sea water.

Funahashi Village

The Smallest Village in Japan with Lotus and Cherry Blossoms

In summer, lotus blossoms bloom in lotus fields at the gates of temples of this small village. There is also a row of cherry trees that stretch for a kilometer along the Kyonotsubo River, making this spot quite lively in spring with the blooming of the cherry blossoms.

Kamiichi Town

Home to Mt. Tsurugi, the Dream of Every Mountain Hiker

Here visitors will find mountains, like Mt. Tsurugi, that have been considered sacred since ancient times, as well as temples and parks situated in lush natural surroundings with sacred water said to help with all ills. There are also many opportunities to use this natural bounty to enjoy forest therapy and trekking.

Tateyama Town

A Key Tourist Spot on the Tateyama Alpine Route

Among the more popular sightseeing locations for visitors from abroad are the impressive and dynamic huge walls of snow, Midagahara wetlands, listed in the Ramsar Convention, and Kurobe Dam, which served as a movie location.

What is the Larger Toyama Core Partner City Region?

In January 2018, Toyama City signed a partnership agreement to form the Larger Toyama Core Partner City Region with the municipalities of Namerikawa City, Funahashi Village, Kamiichi Town, and Tateyama Town. This agreement forms a partnership between Toyama City and four surrounding municipalities to sustain the region's population and economy so that the area residents can live with more comfortably and with peace of mind as Japanese society faces an impending reduction in population, a declining birthrate, and increasing median age. This pamphlet will showcase lovely tour routes and hands-on programs that make use of the tourism resources of the Toyama Area to help promote long-stay tourism.
