It only takes a short ride and walk to visit these restaurants and enjoy a great combination of fresh seafood from Toyama Bay and delicious rice. Introduction to Toyama Sushi

Guide to enjoying the great taste of Toyama sushi

Traditional sushi restaurant

The chef makes the individual sushi immediately after he/she takes the order, which is very different from the style of a conveyor belt restaurant. Enjoy the real experience and the great freshly-made taste of sushi in Toyama.

How to order correctly

It's best to let the chef know what you don't like or you can't eat and how much you would like to pay. It's also a good idea to order something you are interested in and repeat it if you like it.

Toyama sushi is excellent.

A large number and variety of seasonal seafoods are landed in Toyama Bay, and they are delivered to restaurants in a very fresh state. Try the firefly squid and white shrimp that can only be eaten in Toyama.

Toyama's specialty seafood

Buri (Yellowtail)

Well-known as the "King of Toyama Bay." It becomes fattier and richer tasting in winter.

White shrimp

Toyama Bay is the only place in the world where a large number of white shrimp can be caught. They have a melt-in-the-mouth texture and a subtle sweetness.

Toyama shrimp (Humpback shrimp)

These shrimp have plenty of sweetness and flavor with a fleshy texture. Though they are caught all year round, the best season is from autumn to spring.

Red snow crab

Fresh ones are always available during the prime season (September to December) as the fishing ground is very close to Toyama. These crabs attract a lot of fans due to their meaty flesh with a distinctive sweetness.
